

Magma Grant Requests

We are no longer accepting grant proposals for 2022.

The follow outlines the process for Magma grant requests.

The intent of these sponsored/directed funds is to “kickstarting” sustainable, Magma-powered commercial businesses.

Terms & Conditions

- Implements or extends Magma features or functionalities *to drive a Magma-powered product and business*
- Licensed openly under the BSD 3 Clause license
- Limits: up to \$1M and 12 months per PoC

Submissions

Requestors submit proposal to grants@mamacore.org and posts to GitHub under <https://github.com/magma/grants/issues>

Grant proposals that do not follow this flow will not be reviewed

Review Process

Funding sponsor review

Delegates from the sponsoring entity confirm that the proposals are structured with

- clear milestones
- timelines
- deliverables
- logical business case including
 - elevator pitch of TAM
 - sales pipeline
 - demonstrated value to the broader Magma community
- ensure appropriate acceptance criteria for payment once work is completed

Feedback will be provided to submitters to provide opportunity to strengthen proposal where appropriate

Once approved by the sponsoring entity, proposals are sent to the Magma Core Foundation for further review

Magma Core Foundation review

Technical Steering Committee Review

- Review the technical merits of the proposal and requesting team. Details [here](#).

Governing Board Review

- Strategic Commercial Review: does this grant enable a self sustaining business (or is it just a feature for a specific use case)?
- Arbitrates any conflict of interests
- Provides final approval of which proposals will proceed to be funded, leveraging contracts directly from the MCF

Timelines

- All grant proposals for review in current quarter must be submitted by 1st Friday of the final month of the quarter
- All proposals submitted later will be reviewed for the following quarter
